## Hill Billies Win at Namaka 6-2

In the first series of the Provincial Intermediate Softball Playoffs, Didsbury Hill Billies visited Namaka and took them into camp with a score of 6-2.

Getting away to a 2-run lead in the first inning, the Didsbury boys settled down to keep ahead for the rest of the game.

Roman Holub, who was in top form, pitched a wonderful game, obtaining more than his usual number of strikeouts and allowing only one fly to reach the outfield. The rest of the team gave him splendid support, both with the bat and in the field.

Namaka plays a return game at Didsbury tomorrow, Friday, afternoon at 3 p.m., with a double-header to finish the series.

Didsbury—L. Berscht c, R. Holub p, R. Gulliver 1b, Allen 2b, A. Krehs ss, E. Evans 3b; Jay Tuggle, N. Honey, J. Tittsworth, H. Morasch and H. Gulliver, fielders.

Coach - Ellwood Evans.

## Evangelical Church Notes

Rev. W. W. Krueger, D.S., of Regina, will preach at both services Sunday. At the Morning Service Holy Communion will be observed.

There will be Baptism and Reception of members at the morning service next Sunday. Those having children to be baptized should notify the pastor.

The first Quarterly Conference will be held next Sunday evening after the service.

## WEEKLY SERMONETTE

Every place of worship should be a house of friendship.

## General Rainfall Pleases Farmers

Rain was general over a large part of Alberta last Wednesday night Thursday, and farmers in most parts of the province are predicting good grain crops.

Calgary district was drenched under a downpour which brought .42 inches of rain Wednesday night, and precipitation was also reported over many sections of southern Alberta, where the winter wheat and rye harvest is just beginning. No reports of hail have been received.

The rain will be helpful in filling grain which is now making rapid progress toward maturity.

First delivery of winter wheat was made to a Lethbridge elevator on Wednesday from a nearby farm. The grain is a good grade but the yield is not yet determined.

More than an inch of rain fell at Red Deer in the two days, and precipitation has been general throughout the district. Rain was reported Wednesday night and Thursday morning to be general from Edmonton to Calgary. Crops which are now assured of plenty of moisture for filling and now only need sunshine, are looking exceedingly promising in the Red Deer area except for scattered districts hailed out or flattened down by last week's cloudburst.

## United Grain Growers Declare Dividend

A dividend at the rate of four per cent, or one dollar per share, has been declared by the Directors of United Grain Growers, Ltd., for the financial year ending July 31st, 1935. Cheques will be mailed on September 1st, 1935, to shareholders of record at the close of business, July 31st.

The Canadian Legion of the British Empire Service League  
Didsbury Branch No. 106

## MEMORIAL SERVICE

For the Men of the Didsbury District  
Who Fell in the Great War, 1914-1918

"They shall not grow old, as we that are left grow old;  
"Age shall not weary them, nor the years condemn.  
"In the going down of the sun, and in the morning  
"We shall remember them."

At The Butte

Sunday, August 11th, 1935, at 3 p.m.

## Soldier Settlement Field Day.

The Department of Soldier Settlement in co-operation with the seed branch, Dominion department of agriculture, will hold a field day on the farm of N. S. Charlton, West 1/2 Sec. 27-30-1-W5thM., 2 miles north and 1 1/2 miles east of Carstairs, Thursday, August 15th. Program at 2 p.m. sharp. All are cordially invited. A number of grain samples have been grown and will be analyzed for purity of variety.

The principal speakers will be, Mr. L. H. Newman, Dominion Cerealists, Ottawa and Professor J. Murray, Principal of the Olds School of Agriculture.

Mr. L. H. Newman is in charge of all cereal crop experiments at the Central Experimental Farm, Ottawa, as well as all branch farms in the province. He is an excellent speaker, well qualified to give authoritative information on all phases of cereal crop production.

Professor James Murray of the Olds School of Agriculture, being one of ourselves, needs no introduction. He will speak on the production of grasses adapted to this District.

## LOCAL & GENERAL

The Evangelical Sunday School held their annual picnic at St. George's Island, Calgary, on Wednesday July 31st. An enjoyable time was had in spite of the rainy weather.

The votes in the Popularity Contest are piling up. J. W. Halton, returning officer in the contest, requests that the votes be sorted and bundled before they are put in the ballot box.

Mr. and Mrs. J. H. Fleury returned from their province-wide vacation Monday. Jack says he tried some fishing, but had they depended on the finny tribe for a meal they would have starved.

Mr. Gavin Spence, who holds the record in Western Canada as being the one who has furnished the highest grade of piano tuning for 25 years consecutively, will be in Didsbury on or about August 12th with W. H. Norton. Don't take chances get reliable service that can be depended on to return. Leave orders at the Pioneer Office.

## Lymburn and Claypool Address Meetings Here

Hon. J. F. Lymburn, attorney-general for the province of Alberta, and A. B. Claypool, U.F.A. candidate for Didsbury Constituency, addressed a meeting in the Opera House Friday evening. The meeting was well-attended by town residents, but owing to the bad condition of the roads, few people from the country were present.

Mr. Lymburn reviewed the achievements of the U.F.A. government during the last 14 years, stressing the Debt Adjustment Act and the Workmen's Compensation, which tended to make life more secure, and to distribute modern privileges and advantages to the benefit of the people in general. He compared the Douglas and Aberhart schemes of social credit, and was particularly antagonistic towards the latter, saying that the province would have no power to tax imports or exports because the B.N.A. Act specifies that there shall be free trade between the various provinces.

Turning to the Liberal party, Mr. Lymburn referred to it as "Howsonism," and roundly condemned the party's methods and platforms, prophesying that conditions in this country would be worse than in other places if the party should ever come into power again. He alleged that election promises remained unfulfilled after the Liberal party's return in other provinces.

Mr. Norman S. Clarke was chairman of the meeting.

## Knox United Church Notes.

The services next Sunday will be at Westcott at 3.00 p.m. and in town at 7.30 p.m. The theme of the sermon will be, "Our Faithful God." A cordial invitation is extended to all to avail themselves of these services.

The pastor, the Rev. J. R. Geeson, will be leaving in the early part of next week for his holidays, and the Rev. F. E. H. James of Olds will supply for the last two Sundays in August. At Westcott, there will be one service only on Sunday, August 18th at 3 p.m. In the Knox Church there will be services on the 18th and the 25th at 7.30 p.m.

A. B. Claypool, U.F.A. - Independent candidate, will speak at Westcott School on Saturday evening, August 10th at 8 o'clock.

## Interesting Facts About

## PLYMOUTH Binder Twine!

- \* It is made in our mammoth factories at Welland, Ontario. We have been making binder twine since 1882.
- \* Plymouth has unequalled facilities for the spinning of good twine.
- \* It is painstakingly made from carefully selected fiber.
- \* The Plymouth method of spinning is your assurance of smooth-running twine of even size and of full length and strength.
- \* Constant testing insures evenness and uniform strength—your guarantee of satisfaction.
- \* Each individual ball is inspected, tagged with the Sheaf trademark, printed with the name PLYMOUTH and with the words This End Up to insure correct use.
- \* Plymouth Twine is first wrapped in a protective cover of paper and packed in clean, new burlap sacks.
- \* The finished bale of twine weighs 50-lbs. gross.
- \* The bag may be used as a grain sack and the lashing makes a serviceable rope halter.
- \* Millions of pounds of Plymouth Binder Twine are used annually harvesting the grain crops of the World.

## HOW TO MAKE ICED TEA

Infuse six heaping teaspoons of Salada Black Tea in a pint of fresh boiling water. After six minutes strain liquid into two-quart container. While hot, add 1½ cups of granulated sugar and the juice of 2 lemons. Stir well until sugar is dissolved. Fill container with cold water. Do not allow tea to cool before adding the cold water, otherwise liquid will become cloudy. Serve with chipped ice.

## Short Life-Stories

Now and then the writer who is responsible for this column each week feels impelled, instead of writing an article himself, to pass on something he has read which may prove helpful and encouraging to others. This is one of those times when two or three short stories from real life seem to call for repeating.

There has been a lot of talk, the last few years, about how the worker is exploited under capitalism. Not much has been said about the other side of the picture. Let us tell then of a man, a small manufacturer, who, when the crash came, employed twenty people. His business has shrunk during the depression, but the same twenty are still on his payroll. What is more, he is still paying them the same wages. He has done this by ruthless cutting of his own expense, and by dipping into his own capital. He has carried the people who work for him as a personal responsibility. He doesn't like to talk about it. When questioned, he merely shrugs his shoulders and insists that he has done nothing extraordinary. "It's like horses," he says. "When you come in after a hard ride, you see that your mount is fed and watered, don't you? I can't do less for the people who work for me. I can't sleep when I know they aren't sleeping well. That's all there is to it." Such men do more toward making this a better world than a thousand laws, enforced by a million policemen. The Golden Rule is the one code that seems to work.

Real life beats anything the fiction writer can invent. Take the case of another man who used to be branch manager for a big concern. He had an impressive suite of offices, and a number of people working under him. He belonged to the best clubs, drove a big car, and lived well. As the years passed, he grew to take his position for granted. He began to pay more attention to outside interests and less to his job. Times grew hard, but he still took things easily. The home office was troubled. Hints, increasingly broad, seemed to have no effect on him. Finally it was decided that he must be discharged. But the boss, remembering his long years of service, intervened, and, in compromise, he was recalled to the home office. There he was given a desk among the city salesmen. It must have been a hard dose for him to swallow, but if he felt humiliated, he did not show it. He never referred to his former grandeur as a branch manager. Always smiling, he was down earlier than any of the cubs; and stayed later. He took what leads were given to him—most of them considered too hopeless for a good man to bother with—and did his best. It was soon forgotten that he had been demoted. He was accepted as just another salesman. No one paid much attention to him. The younger men rather smiled at the zeal of "old" Blank, as they called him. When not on the street, he was always telephoning somebody, or busily thumbing over his prospect file. In the front office, however, a strange thing was noted. Blank's sales began to climb. Customers—big ones—appeared out of the blue, insisting that they must deal with Mr. Blank. The other day, Blank was made General Sales Manager.

It is doubtful if there is any better cure for the weariness of spirit which comes from endless discussion of economics or disputation over such things as politics, than an hour or two with a microscope. For a trifling sum of money, one gains admission to a world full of new and fascinating things. In a single drop of water, scooped from the nearest ditch, there is literally endless entertainment. After a time in this world, with its breathless dramas and life-and-death struggles between incredible creatures, the real world seems curiously remote and unreal. One returns to it refreshed, and with a saner point of view. There is the man whose whole life collapsed in disaster. He saw nothing ahead, and as he stood one night in the bow of the ship which was taking him back to the wreckage of his career, he resolved to throw himself into the dark waves. But he happened to glance up to the great arch of the skies, filled with timeless stars; and suddenly his own life, happy or otherwise, seemed oddly unimportant. He returned to his problems, solved many of them, built a new and successful career upon the ruins of the failure—and, incidentally, became famous as an astronomer.

This is the time of year when young men, just out of school and college, are trying to plan their futures. Many write to friends, asking advice. The advice given by one such friend to a young man was as follows: All I can answer is that if I were just starting out to hunt a career, I'd look for it as far away from the big cities as I possibly could. There is more glamour in city life—perhaps more of what is called "success". The money-making possibilities are greater. But from what I have been able to observe in my journey through this vale of tears, the small-town man gets the most fun out of life. He may earn less, in dollars, than his city cousin does; but his living costs less, and he has more time in which to enjoy the dollars he has. If I had my life to live over, I think I'd start out by heading for a small community, and dig in there. Every now and then I'd visit a big city just to remind myself how smart I'd been to become a small-town fellow.

## Expedition To Greenland

## British Scientists To Spend Three Months In Arctic

Under the leadership of L. J. Wager, 14 members of the British East Greenland expedition left Aberdeen, Scotland, recently in Sir Ernest Shackleton's exploration ship, The Quest.

They planned to spend three months in the Arctic engaged in scientific work and will explore several mountains which have never before been visited.

The Quest is manned by a crew of Norwegians. Four members of the expedition were accompanied by their wives.

## The Hat Went Home

## Story From Liverpool Could Be Used By Ripley

An astonishing hat trick was performed by a 77 miles an hour gale on Merseyside. A Bebbington (Birkenhead) man bought a new hat at a Liverpool shop, put it on his head, and carried his old hat in a paper bag. When he reached Bebbington Station the wind lifted his new hat from his head and sent it sailing over the tops of the houses and out of sight. On reaching home he was amazed to find his new hat on the kitchen table. It had dropped in his backyard. 2107

## To Promote Highway Safety

## Ontario To Cope With Rising Tide Of Automobile Accidents

To cope with the rising tide of deaths from automobile accidents in Ontario, Hon. T. B. McQuesten, minister of highways and acting attorney-general, announced 12 constables had been added to the provincial police force, most of them detailed to the highway traffic patrol.

Provision for additional traffic police marked the latest step in Mr. McQuesten's campaign to promote highway safety. Possession of a driver's license has been made the basis for enforcing the traffic laws, said the minister, and he listed two other features of his safety campaign—police inspection of motor vehicles and equipment and an advertising campaign.

Departmental records showed 202 persons had been killed in automobile accidents during the first six months of this year, compared with 164 in the corresponding period of 1934. The June death toll was 44, an increase of 12 above the May total.

"A small fine does not quite meet the situation," said Mr. McQuesten. "We will get more attention to the law if we exercise freely the cancellation of the driver's license for a term."

## Giant Air Cruiser

## United States Army Air Corps To Test Out Machine

A giant "flying battle cruiser," claimed the fastest and longest range bombing plane ever built, will be tested soon by the United States army air corps at Wright Field, Dayton, Ohio.

Specifications demanded by the air corps included: A speed of 200 to 250 miles an hour at 10,000 feet altitude, an operating speed of from 170 to 220 miles an hour at the same altitude; endurance at operating speed of from 6 to 10 hours, and a service ceiling of from 20,000 to 25,000 feet.

The aerial battle cruiser has a wing span of approximately 100 feet, length of 70 feet, height of 15 feet, and gross weight of about 15 tons.

## Just a Coincidence

## Science Of Deduction Came As A Shock To Bus Conductor

A remarkable experience befell Col. Foley when he was traveling along Oxford street in a bus and heard the conductor telling a passenger the names of the shops that originally stood on the site of a large store. Surmising that the man had probably delivered letters there Col. Foley asked him: "How long ago were you a postman?"

"How did you know I was a postman?" the conductor retorted. "Quite simple, my dear Watson," said the colonel.

The man who had evidently not read his "Sherlock Holmes", nearly fell off the bus. His name actually was Watson.

## New C.P.R. Liner

## New Sister Ship For Empress Of Britain Is Projected

Sir Edward Beatty, president of the Canadian Pacific Railway Company, said before sailing to Canada from Southampton recently a sister ship for the Empress of Britain would be built.

"We shall need a new liner of the same type as the Empress of Britain," Sir Edward said, "to give a balanced service."

He added that an order would be placed two years before withdrawal from service of the Empress of Australia and the question of replacing that liner would come up within the next five years.

## Substitute For Wool

A process to turn silk into a wool substitute which may free Japan from wool imports is claimed to have been found by Tohei Sakamoto, 38, inventor. He has produced a fibre declared to possess the elasticity, lustre and strength of good grade wool. Use of the process would also raise the price of raw silk, a condition which is largely responsible for the depression in the agricultural communities.

## DARLING ONE-PIECE DRESS—REMOVABLE CAPE THAT BUTTONS TO FRONT OF DRESS

By Ellen Worth

Here's a darling little dress—and so unbelievably simple to sew. Well, it could almost be run up before breakfast.

Two ways to make! Smart either way—with or without the removable cape collar.

For playtime you'll probably choose from the very practical cottons as crinkly crepe prints, percale prints, broadcloths, gingham, etc., and trim with contrasting bias binds. For daintier wear, it is just as pretty as can be of sheer cottons as dimity, batiste, dotted swiss, organdie, etc.

Style No. 524 is designed for sizes 2, 4 and 6 years. Size 4 requires 2 yards of 39-inch material with 1½ yards of 1-inch ribbon for dress with collar and 1½ yards of 35-inch material for dress without collar.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave., E., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

The magnetic poles are the points on the earth's surface where the lines of magnetic force are vertical. They are the ends of the axis of the earth's magnetic polarity.

## For Prison Reform

## Borstal System Is Recommended For Canada

After studying in detail application and operation of the Borstal system in six English prisons, General D. M. Ormond, superintendent of Canadian penitentiaries, has reported to the Dominion government his opinion that similar training and treatment of youthful offenders can and ought to be put into effect in Canada.

Hon. Hugh Guthrie, minister of justice, tabled General Ormond's report in the House of Commons and declared the system may be made effective in Canada within 60 days. No legislation and no extra money vote would be necessary but there would be some staff additions and extra buildings needed.

The Borstal system, forecast for Canada in the speech from the throne at parliament's opening in January, "is a combination of mental, moral, physical and industrial training of a strenuous kind," for convicts under the age of 21 years.

Selected penitentiary inmates under the age of 21 would be housed separately and made the subject of this training with a view to correcting criminal instincts and preparing the youth for more useful effort on discharge.

## New Type Radio Sets

## France Is Installing Penny-In-The-Slot Machines

Penny-in-the-slot radio sets for the home have been introduced in France. Instead of buying a set, it is possible to have installed free a high-powered set with a small slot machine attached. On putting a franc into the slot 40 minutes' radio programme is assured. This may be either at a stretch or in several short programmes until the 40 minutes are exhausted. A maximum of ten francs may be put in at a time, thus ensuring nearly seven hours of music.

## HEALTH MEANS CHARM AND HAPPINESS

Sparkling eyes and smiling lips speak of health and vitality. Clear skin attracts. The healthy active girl is both happy and popular.

Perhaps you are not really ill yet when the day's work is done you are too tired to enter into the good times that other women enjoy. For extra energy, try Lydia E. Pinkham's Vegetable Compound. It tones up your general health. Gives you more pep—more charm.

Remember that 98 out of 100 women report benefit. Let it help you too.

## Quaint English Ceremony, Redolent of Olden Chivalry, Held at Westminster Abbey

A ceremony redolent of the chivalry of old and performed only twice during the last 100 years, took place in the noble Henry the Seventh chapel of Westminster Abbey recently as the Duke of Connaught, Great Master of the Order of the Bath, installed 21 Knights of the Grand Cross.

Having its origin in Saxon days the installation was once directly associated with the symbolic act of bathing. New knights were generally appointed at a sovereign's coronation or creation of the Prince of Wales. At the coronation of Tudor Mary new admissions were made at the Tower of London when the knights "satt in the bath all nakyd except for a linnen breech."

This ceremonial continued until days of Charles II.

Habited in sweeping mantles the Great Master with the Knights of the Grand Cross and officers of the order went in procession from the Chapter House, headed by the King's almsmen, trumpeters and clergy, through the ancient abbey cloisters to the presbytery, where a short service was conducted.

The Great Master with his retinue then moved to the doors of Henry the Seventh's chapel. The King of Arms of the Bath knocked. "Who knocks?" demanded Walter Tapper, surveyor of the abbey from within.

"In the name of the King, His Royal Highness, Great Master of the Most Honorable Order of the Bath, demands entrance into the chapel of the order," replied the King of Arms.

The doors were thereupon opened and the quaintly garbed company entered, where many Canadian colors were deposited during the war when battalions left England for the front.

Those knights who had already been installed took their places and new knights ascended allotted stalls but remained standing. Attended by the Dean of Westminster the Great Master proceeded to the stall of the senior new knight to whom he delivered the book of statutes.

The dean administered the oath of the order to every other new knight repeating it with him: "You shall honor God above all things, you shall be steadfast in faith in Christ. You shall love the King, your sovereign lord, and his right defend your power. You shall defend maidens, widows and orphans in their rights. You shall suffer no extortion as far as you may prevent it. And of as great honor be this order unto you as ever it was to any of your progenitors or others."

The procession re-formed and with the singing of hymns returned to the Chapter House.

### The First Hitch-Hikers

#### Soldiers Started Habit In Europe During The War

Back from a hitch-hiking tour of the world, Rev. Elsworth Toll and his brother, Rev. Leroy Toll, sons of a former minister of Ontario, say they had great luck catching rides in Europe. They had been told you could not hitch-hike there, but they tried it and found it a most successful venture.

As a matter of fact, hitch-hiking by motor really started in Europe. During the war, soldiers used to thumb their way through France by getting rides. More than one man has left the front line early in the morning to go on leave and has abandoned the regular routes for hitch-hiking; so successful was the thumbing that it was quite the common thing to get right from the front line to Boulogne or Calais and the boat in a day. It was the same thing going back from the Channel ports to the line. It was never necessary to wait very long for a ride. Sometimes it was a truck and occasionally it would be a fast car. Now and again the ride would be in a motorcycle side-car.

So hitch-hiking really is not starting in Europe, it is just returning to its original home grounds.

### Decreases Weed Growth

#### Results Of Application Of Fresh Or Rotted Manure Are Shown (By F. M. MacIsaac)

Results of four years weed survey work at the Dominion Experimental Station at Scott, Saskatchewan, indicate that applications of fresh or rotted manure do not increase weed growth.

The weed counts were made in three different experiments, each conducted as a three-year rotation of summerfallow and two grain crops. The first crop after fallow was wheat in all cases, while the second crops were wheat, oats and barley. The manure was applied at the rate of twelve tons per acre to affect the second crop after fallow as follows: Fresh manure in winter on first year stubble, spring ploughed before seeding in the following spring; rotted manure applied as a top dressing after seeding on spring ploughed stubble; check plot which received no manure and was spring ploughed before seeding; rotted manure spread on first year stubble and ploughed under in the fall, seeded the following spring; rotted manure applied to first year stubble in the spring and ploughed under before seeding.

These experiments have been conducted over a period of twenty years on plots one-fourth of an acre in size. The weed counts were taken on two separate square yard areas on each plot, after the middle of June, or just before the grain was in shot blade. This late date permitted the germination of practically all weeds.

A study of the four years' data on weed counts shows that with both wheat and oats, the check plot receiving no manure had a higher number of weed plants than any of the manured plots. In the case of barley, the plot receiving manure as a top dressing after seeding had the most weeds, with the check plot second in this respect. Comparing the five treatments for the three crops, manure ploughed under in the fall gave the lowest weed count. With wheat, the weed count was only 26 per cent. of that of the plot receiving no manure, with barley fourteen per cent. and with oats twenty per cent. Ploughing under manure in the spring gave the next lowest weed count. It is also worthy of note that the two last mentioned treatments have given the highest yield of grain over a period of twenty years. There was little difference found in the number of weed varieties present for any particular crop or treatment, but the number of weed plants showed a wide variation.

In general, it may be stated that the degree of weed infestation in grain crops is materially decreased by applications of manure, and that best results are obtained from ploughing under rotted manure, either in the fall or spring. Furthermore, owing to the heavier stands of grain following applications of manure, weeds present are less vigorous and consequently take less moisture from the crop.

### Boy King Learns Trade

#### Peter Of Yugoslavia Earns Extra Money He Needs

Eleven-year-old King Peter of Yugoslavia, who is being educated in Belgrade, has announced in no uncertain way that the small amount of spending money allowed him by his mother does not fill his needs. Instead of asking for an increase he said: "I shall have to learn a trade and earn a little money." He asked his mother if he might have a carpenter's shop set up at the palace so that he might learn carpentry. "You must see that I turn out good things," he said to the master carpenter who is teaching him. "I have simply got to make money by selling them." King Peter should soon have plenty of coins jingling in his pocket, for the Queen is allowing her son's work to be put up for auction.

Snail hunting is a sport in France.

### People With Odd Appetites

#### Almost Incredible Stories About Boys In Seventeenth Century

About the year 1760 there was in the village of Selborne, Hampshire, England, a boy whose whole life seemed to be centred around bees; he ate them, he played with them and had no other interest in life than bees. His main characteristics were very much akin to those of his absorption, for he became semi-comatose in winter, but in the summer he became bright and alert, and haunted the fields and sunny banks incessantly.

He seemed to be completely immune from the stings of bees of all sorts, wasps, hornets and the like; he would seize them, tear out their stings, and suck the honey from their bodies in a most inhuman manner, sometimes robbing hives of their inmates to the great detriment of their owners. He made a species of humming noise as he ran about, and was very alert mentally regarding bees; but in all other ways he was a dullard. He left Selborne as a young man but is said to have died before becoming fully grown.

A boy who ate stones was to be seen at Avignon in May, 1760; he would swallow flints of great size to the number of some 25 a day. Pebbles and marbles he ground to powder and made a sort of paste, of which he was very fond. On examination, he was found to have an unusually large gullet, extra strong teeth and a most corrosive digestive apparatus. It was his habit to sleep for twelve hours a day and to smoke incessantly for the remaining twelve. He was practically inarticulate, and believed to have been born in Derbyshire, where he made inroads into the stone walls surrounding the fields. His drink was water, wine or brandy, of which he was extremely fond. He is stated to have lived on this stony diet for upwards of thirty years.

## Establishment Of The Canadian Wheat Board May Take Some Time

### Some Peculiar Pets

#### Shop In Camden Town, London, Sells Queer Animals

Furry animals smaller than the size of one's fist, with lions' tails and kangaroos' legs, dormice with frisky, squirrel-like tails, bullfinches with a repertoire of three popular tunes, sinister-looking bird-eating spiders, gaily chattering crimson macaws, yellow-shirted lizards, and sleepy scorpions. Noah would have gone into raptures had he been able to include this collection in his Ark.

They are all to be found, says a writer in Tit-Bits, and lots more besides them, in a little shop in Camden Town, London, where people from the four corners of the globe come to choose their pets. But stranger than these living novelties of Nature are some of the tales their owner, Mr. George Palmer, F.Z.S., has to tell of those who purchase them.

Some pets leave the emporium in search of fame on the screen. Two ravens were recently dispatched to appear in a film, "The Tower of London." Report says they performed creditably. But not so twelve bullfrogs Mr. Palmer supplied to a British studio. Film fright overtook them the moment they appeared on the set, and despite the producer's frenzied efforts to induce a croak, they remained dumb-struck.

One secret of running a successful pet store is the ability to keep abreast of woman's fashions. Women order pets to harmonize with their favorite color schemes, and to match their new frocks!

Formation of the Canadian Wheat Board as authorized in an act which was given royal assent when parliament prorogued, will probably take some weeks. In the meantime the Canadian Co-operative Wheat Producers, Limited, who hold some 226,000,000 bushels of wheat on government account, the entire Canadian carry-over, will liquidate these stocks as and when possible.

John I. McFarland, head of the company and agent for the government in market stabilizing efforts which resulted in this wheat being held on government account, will be chairman of the board, it is understood, providing his health permits.

Some months ago Mr. McFarland suffered a breakdown and is only recently out of hospital.

The act contemplates the creation of a board of three, and an advisory committee of not more than seven, with the majority representative of the producers, to be paid only for actual services rendered from time to time.

Existing selling agencies will continue to operate after the board is appointed, but the board will undertake to buy all wheat which the regular trade cannot or will not absorb, at a fixed minimum price. The board may buy only from the producers and in addition to the minimum price will issue share certificates which will entitle the producers to a pro rata distribution of any profits the board may achieve from each year's operations.

In the event of any situation rendering such action advisable the board may secure proclamation of certain sections of the act which will give it exclusive powers to take over all grain elevators in western Canada and control the marketing of all wheat. The provisions may be extended also to coarse grains by order-in-council, if deemed necessary. The fixed minimum price to wheat producers will be set by the board with the approval of the governor-in-council.

One provision of the act authorizes the new board to take over from the Canadian Co-operative Wheat Producers, Limited, the grain now held by that organization on the government stabilization account.

### The Romance Of Rope

#### Story Can Be Traced Back Thousands Of Years

Whether you are a schoolgirl skipping rope, a cowboy lassoing cattle, a painter standing on a scaffolding, a motorist whose car is being towed, a housewife hanging a clothesline, or a yachtsman reefing a mainsail, you are dependent on rope for the accomplishment of some daily task.

Once "rope" and "hemp" were synonymous, but to-day very little rope is made of hemp. Abaca, a fibre grown in the Philippines, has all but shouldered hemp out of the rope industry. But because of old traditions in rope-making, and an early error, abaca is spoken of in the cordage trade as "Manila hemp."

If the thread of the story of rope—and first hemp—is traced back far enough, it will lead to the court of Shen Nung, Emperor of China, 2,700 years before Christ. He taught his subjects to grow "ma" (hemp), a plant of both male and female forms, used for making hempen cloth. In the eighth century India knew the hemp plant principally as a source of drugs. Neither the Hebrews nor the Egyptians were familiar with it; but during medieval times it was found in Northern Africa.

Migrant civilizations introduced hemp into Europe about 1500 B.C., but no commercial importance was attached to the European plants until the French imported Chinese hemp centuries later. Italy turned its attention to hemp growing, and to-day, the highest-priced hemp in the markets of either Europe or America is grown there. South America received its first plants from Spain.

## The SNAPSHOT GUILD

'Close-ups' and 'Back-lighting'

Proper lighting will add much to the quality of your pictures

With the sun so much brighter and stronger now, it is time to exercise a little care in shooting directly into the sun when taking snapshots to avoid "lens-flare" in your pictures. I do not mean by this that you should make it a strict rule not to take pictures with the sun shining directly toward you and your camera for in doing so you will pass by many chances to incorporate fascinating, artistic "back-lighting" in your pictures. However, it's a caution worth remembering.

Lighting is of equal importance with arrangement of the objects or subjects in your proposed picture. It is the variation in the lights and shadows that gives a picture depth and roundness, making the subject stand out from its surroundings. Usually the shadows should be transparent, to a degree, but full in detail. This is obtained by a rather full exposure. If the sun strikes directly in a person's face they are likely to squint and the picture will not be a good likeness. Better have them turn slightly so that they are not bothered by the sun—then you will get a natural, life-like expression. Another point is to avoid making a close-up of a person out in glaring midday sun. At this time of day the strong overhead light casts heavy shadows under the eyes and nose and the picture is far from pleasing. When making a picture of a person during the middle of the

day be sure to have him turn his face away from the sun or snap him in bright shade, which can be done very successfully with modern snapshot film.

If the illumination, or sunlight, comes from directly back of the camera, the shadows are more or less lost, giving a flat appearance. When you are a little more advanced, try some early morning or late afternoon shots for splendid pictorial studies for at these hours you get long, fascinating shadows.

Attractive, artistic pictures may be made from a position where you face the sun and shadows fall toward your camera rather than away from it. In "back-lighting" work of this kind, be sure that no sun rays directly strike the lens of your camera. This can often be avoided by standing so that the shadow of a tree trunk, a bush or the corner of a building protects the lens from these direct sun rays.

Under such conditions you should give a slightly longer exposure than would be necessary if the sun rays were directly on the front of the subject. Perhaps the next larger diaphragm opening will let in enough light to record the detail desired in the shaded parts, or, if using a small aperture for increased depth of focus, a slow exposure, 1/10 of a second, or a very short time exposure will bring excellent results. Try it.

JOHN VAN GUILDER.

### First Wild Duck Census Starts in Canada & U.S.

With the status of America's wild  
ducks a subject of nationwide concern  
after disastrous successive  
droughts in their great prairie nest-  
ing areas in mid-continental Canada  
and the United States, the "More  
Gamebirds Foundation" has an-  
nounced the launching of the first  
wild duck census of its kind ever  
attempted. The investigation is to  
include literally a house-to-house  
cavass of Mr. and Mrs. Wild Duck  
and their families now hatching in  
Alberta, Saskatchewan, Manitoba,  
North Dakota, South Dakota, Min-  
nesota and part of Nebraska.

Airplane flights into the Canadian  
Northwest are planned to cover  
remote nesting areas. Automobiles  
equipped to negotiate the rugged  
terrain of more accessible sections  
have been provided a party of eight  
Foundation fieldmen already initiat-  
ing the census work.

Hoyes Lloyd, Dominion Supervi-  
sor of Wildlife Protection; J. F.  
Andrew, A. E. Etter and A. G. Cun-  
ningham, provincial game officials  
of Alberta, Saskatchewan and Mani-  
toba respectively, are co-operating  
in the movement. In the United  
States the aid of A. I. Peterson,  
North Dakota Commissioner; O. H.  
Johnson, South Dakota Director of  
Game and Fish; F. B. O'Connell,  
Nebraska game head, and E. Swen-  
son, Director of Minnesota Division  
of Fish and Game, is being enlisted.

State and provincial sportsmen's  
organizations and thousands of other  
volunteer duck census-takers are to  
participate in the comprehensive plan  
of coverage. From central head-  
quarters in each state and province  
local groups will be supplied with  
questionnaire forms. These groups  
in turn will distribute them to farm-  
ers, backwoodsmen and sportsmen,  
each of whom will cover a predeter-  
mined section mapped out. Reports  
are to be consolidated by reversing  
the process, and the results publish-  
ed by the Foundation as a contribu-  
tion to waterfowl restoration.

Data to be sought will include  
location of favored nesting areas,  
number of mother-ducks with broods,  
number of ducklings to the brood,  
number of nests, old ducks without  
broods, and the total number of all  
ducks by species. Information also  
sought will be the causes of losses  
on breeding-grounds and what can  
be done to eliminate them and im-  
prove important nesting areas.

Representation in the census of  
the work of the National Associa-  
tion of Audubon Societies has been  
invited.

The local branch of the Alberta  
Fish and Game Assn. is actively  
interested in this work and any  
members or others interested, who  
can supply information regarding  
the above data should communicate  
with Mr. George Julien or Mr. J. H.  
Fleury.

### Enlivens Organists' Conference

The international organists' con-  
ference being held at London was  
enlivened last Thursday by Prof.  
Collingwood, of Saskatoon, who  
told of a notice he had seen outside  
a Canadian church. The subject of  
the sermon "What Hell is Like,"  
was followed by, "Come Hear Our  
Organ."

### "Kritiks' Korner."

The town "Fathers" deserve  
much credit for the improvements  
that have been and are being made  
to our town. A goodly number of  
the property owners as well are to  
be commended for the appearance  
of their buildings and grounds. We  
are glad to witness this growing  
spirit of pride and hope that those  
who have not yet been affected by  
it, will soon catch it.

If those having vacant lots do  
not mow the grass and weeds, the  
town should do it and add the ex-  
pense of the work to the owners  
taxes.

### Westcott Notes.

Westcott Women's Institute met  
at the home of Mrs. Dan Klinck for  
their last meeting, opening with  
O Canada and the reading of the  
Creed.

The comforter for the fall bazar  
was tied, following which business  
was transacted. Roll-call was an-  
swered by giving a Sewing Hint.

Mrs. James Hughes gave a very  
interesting report on the district  
conference held at Carstairs. She  
also gave a talk on the instructions  
and demonstrations given at the  
Olds School of Agriculture during  
Farm Women's Week.

With the singing of the National  
Anthem the meeting closed and  
lunch was served by the hostess.  
Mrs. R. McFarlane will have the  
next meeting.

### Doings Of Our Neighbors.

At Red Deer: The 45th Annual  
Fair which ended July 27th was a  
decided success.

At Innisfail: The Innisfail rifle  
team won 1st, 4th, 5th and 7th  
places on the Alberta team which  
goes to Ottawa for the Dominion  
shoot, through their splendid show-  
ing in the Calgary shoot.

At Olds: The Olds Fair has  
been postponed to August 13th and  
14th.

The Central Creamery was bro-  
ken into, this being the second time  
during the summer. Three pounds  
of butter and some cream were  
found to be missing.

At Carstairs: The cistern at the  
curling rink is catching lots of  
water and is now within 3 feet of  
the top. When filled it will give  
icemakers around 10,000 gallons of  
rainwater to play with.

Lightning struck the Downie  
house during the recent electrical  
storm and damaged the roof and  
chimney. Mrs. Russell McCoy was  
stunned by the same flash.

### B.C. Will Pave 275 Miles of Roads

Hard surfacing of highways is a profitable investment, as has been proved time and again. Despite the higher initial outlay, the comparatively small maintenance cost shows that construction of this kind is good business in the long run.

In this province the Alberta Motor Association has for years advocated the improvement of highways and has reiterated the outstanding value of hard surfaced roads.

During the last session of the legislature, the government announced that approximately 50 miles of highways located near Edmonton and Calgary would be paved this year. As yet, however, work has not yet commenced.

In the sister province of British Columbia, however, special attention is being given to hard surfacing and this is a big item on that province's \$1,500,000 road improvement program for 1935.

Alberta motorists will be interested in this program, which includes the hard surfacing of some 20 miles of the road from Cranbrook to the U.S. border. This is a route used by many Alberta drivers in going or returning from British Columbia.

A four-mile stretch of the Trans-Canada highway west of the Alberta boundary, also will be surfaced, in addition to four miles west of Revelstoke, which also is on this highway.

British Columbia expects to complete between 250 and 275 miles of hard surfacing this year.

### Burnside Notes.

There was splendid weather for the postponed picnic which took place Monday at Lone Pine Hall. A good crowd turned out to watch the ball tournament and root for the local team which won first money, with Torrington second and Sunnyslope third. It was the best brand of ball seen in this district for a good many years, and got much applause from the crowd. The scores were: Lone Pine v. Sunnyslope, 8-0; Lone Pine v. Torrington, 9-3.

The last whist drive of the season will be held this Saturday evening in Lone Pine Hall. After the drive, the scores will be totalled and the grand prizes for the season given out.

Mrs. Joe Clarke is visiting her sister, Mrs. Mackie at Arrowood.

Mr. and Mrs. George Burns spent Sunday with Mr. and Mrs. Hugh McLean.

Mrs. Walter Fulkerth and two sons are visiting the former's parents, Mr. and Mrs. Wm. McCulloch.

Mr. and Mrs. Noah Eckel, Mrs. Leah Doll and Miss Evelyn Charlton were Sunday dinner visitors at Sam McAllister's.

Mr. Bill McCulloch, who has been in the Didsbury Hospital, returned to the home of his parents, Mr. and Mrs. Wm. McCulloch this week, where he will spend some time recuperating from an operation for appendicitis.

Miss Tena McLean of the staff of the mental hospital at Ponoka is spending her holidays here with her parents, Mr. and Mrs. Hugh McLean, and also attending her mother, who is in very poor health.

Mrs. Bittner, Gus, Rosie, Mona, Clark Owens, Jack Clarke, Ellwood Topley, and Bill Wulaka were visitors at the N. Eckel home on Friday evening.

Mr. and Mrs. Levi Story, Mrs. Ruben Boyce, and Mr. Jack Clarke, all of Carstairs, and Miss Baldwin of Rockyford were Sunday visitors at the home of Mr. Geo. Metz.

Mr. and Mrs. John Topley, Grace, and Joyce motored to Edmonton on Friday, returning Sunday, accompanied by their two daughters Elsie and Jessie Topley, who are training at the Royal Alexandra Hospital there, and will spend their holidays here.

## WORLD HAPPENINGS BRIEFLY TOLD

A Soviet scientific expedition headed by George Uschikoff, assistant manager of the Russian Northern sea route has started to seek an Arctic passage from Asia to Europe.

The giant machinery in the plant of the Manitoba Paper Co., was turning for the first time since February, 1932, bringing new life to Pine Falls as 200 men returned to work.

H. G. Wells, historian, novelist and sociologist, intends to devote the next three years to the films, he says, "good films, serious, imaginative, artistic films."

The second conference on Canadian-American affairs — unofficially known as the "North American Community Council"—will be held at Queen's University in Kingston, Ont., next June.

The Soviet government has ordered the construction of 16 airplanes of the type of the Maxim Gorky, which—until it crashed May 18, killing 49 persons—was the largest land plane in the world.

Dr. Allen Peebles, London, Ont., has been appointed as technical adviser to the investigatory committee on state health insurance, Hon. G. M. Weir, British Columbia provincial secretary, announced in Victoria.

"The growth of bureaucracy in Canada is something that should be watched," said J. W. Deb. Farris, K.C., is delivering the inaugural address at the opening of the annual convention of the Law Society of British Columbia.

Manitoba highway accident toll for the first half of this year is 20 dead, 62 seriously injured and 77 injured to the extent of requiring medical attention. Figures were revealed by Hon. W. J. Major, K.C., attorney-general.

Canada's ties with Great Britain can be measured only "in a brotherly and friendly spirit and not in dollars and cents," Hon. Raymond Morand of Windsor, Ont., deputy speaker of the Canadian House of Commons, declared at a luncheon for delegates to the Empire Parliamentary Association in London.

## League Representation

### Sir Robert Falconer Wants A Foreign Minister For Canada

Hope that Canada would establish a separate "ministry of foreign affairs," was expressed by Sir Robert Falconer, president of the League of Nations Society, at Ottawa.

"As Great Britain has appointed a minister of League of Nations affairs, Canada also might surely participate more fully in its affairs. While the effects of Italian and Japanese policies may seem remote from Canadians, we cannot be sure that they would not involve us in serious consequences, therefore, we should at once take our part as a people more fully in consideration of world affairs."

## Experimental Bridge

A young man whose knowledge of cards was vague, was roped in to complete a bridge four.

He committed his first mistake by throwing away a king on a trick already taken by his opponent's ace.

"Good heavens!" bellowed the young man's partner, "a king doesn't beat an ace."

"I know," stammered the beginner, "but I thought I'd find out."

## The Trans-Canada Airway

### Way Is Being Prepared For Coast To Coast Service

The trans-Canada airway will be a reality within a couple of years if the appropriation made for civil aviation in the supplementary estimates brought down in parliament is amplified by similar votes in the next two years. What is being done now, is to prepare the way—physically. The operation of the service and its nature and extent will be a matter of policy to be determined when everything is ready. But the plans all contemplate an air service across the country handling mails and passengers. Depending upon the type of machine used and making allowance for landings, it should be possible to fly from Montreal to Vancouver in 15 hours or less.

The appropriations now made, however, are wholly for preparatory work—the construction of airdromes, landing fields, night lighting, wireless facilities and other accessories of the service. It will also be necessary to carry on extensive investigations through trial flights, the investigation of atmospheric conditions and the best routes for flying. The work is now well advanced with 49 landing places constructed while the new appropriation of almost \$500,000 will enable it to be actively prosecuted this year. The engineers have the whole plan laid out and this year's appropriations will simply fit in with what has been done previously.

In another branch of civil aviation—the air service performed for the different departments by the Air Force—there is an increased vote of \$305,000. This will allow the carrying on of extra preventive services for the Mounted Police aerial surveys and a variety of similar operations.

Similarly the military end of flying will have an impetus in the vote of \$500,000 for maintenance and training. This contemplates a certain addition of the personnel of the Air Force, but the exact number is not yet determined.

## Making Map Of Mars

### Famous Astronomer's Work Being Completed By His Widow

The monumental work of making a map of Mars, begun more than 50 years ago by the famous astronomer, Camille Flammarion, is being completed by his widow.

Madame Gabrielle Flammarion, who was the second wife of "the poet of the skies," works 15 hours a day to complete her late husband's life work. The observatory in which she works is in a garden where he buried the bodies of her husband and his first wife.

Every night, when conditions permit, Mme. Flammarion focusses her powerful telescope on the red planet, studying all its phases and taking innumerable photographs. When atmospheric conditions are bad, she works at her charts of the planet, filling in the unknown spaces. It is said that she knows the "canals" of Mars better than she knows the streets of Juvisy, the Paris suburb where she lives.

## Recipes For This Week

(By Betty Barclay)

### RED RASPBERRY JELLY

4 cups (2 lbs.) juice  
7½ cups (3¼ lbs.) sugar  
1 bottle fruit pectin

To prepare juice, crush thoroughly or grind about 3 quarts of fully ripe berries. Place in jelly cloth or bag and squeeze out juice. Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire and at once add bottled fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard ½ minute. Remove from fire, skim, pour quickly. Paraffin at once. Makes about 11 glasses (6 fluid ounces each).

### PLUM RELISH

3½ cups (1½ lbs.) prepared fruit  
6½ cups (2½ lbs.) sugar  
½ cup vinegar  
½ bottle fruit pectin

To prepare fruit, pit (do not peel), about 2 pounds fully ripe plums. Grind or chop fine; add 1 teaspoon each cinnamon, cloves, and allspice, or any desired combination of spices.

Measure sugar, prepared fruit and vinegar into large kettle; mix well and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Remove from fire and stir in bottled fruit pectin. Skim; pour quickly. Paraffin hot relish at once. Makes about 10 glasses (6 fluid ounces each).

Anyone can tell you the way to invest money. It's the way you didn't.

## Princess For A Day

### Maid In Archbishop's House Has Unique Wedding In York

This is the story of the romantic wedding of a kitchen maid and her cobbler lover and it's no fairy tale. They were married by a Prince of the Church. The bride held her wedding day court in an ancient palace and she was robed in a room once occupied by a future King and Queen of England.

The princess-for-a-day was Dorothy Shaw. She worked "below stairs" in that historic old palace at Bishopthorpe, which is the home of the Archbishops of York. Dorothy's bridegroom was George Wilson, a young cobbler. Their marriage might have been just the usual happy ending to a country courtship—but Most Rev. William Temple, Archbishop of York, waved a magic wand.

The prelate, who helped to marry the Duke and Duchess of Kent at Westminster Abbey last November, decided that he would wed Miss Shaw and her lover at the altar in the little village church at Bishopthorpe. Better still, he threw open his palace to the bride and bridegroom and all their relatives and friends, and he and Mrs. Temple acted as host and hostess at the wedding breakfast in the centuries-old common room. The church itself was specially decorated with flowers from the palace greenhouse. Every member of the palace staff was in the congregation.

After the wedding breakfast Dorothy changed for her honeymoon journey in an apartment once occupied by King Edward and Queen Alexandra when they were Prince and Princess of Wales. Then, in the Archbishop's limousine the maid and cobbler drove away underneath an archway that Cardinal Wolsey knew.

## Pocket Knife For Dolls' House

### Tiny Gift For Queen Mary Made From Steel 115 Years Old

The Queen is adding to the Queen's Dolls' House at Windsor Castle a tiny pocket-knife, the blade of which weighs one-hundredth part of an ounce, or the equivalent of the weight of seven penny stamps. But it cuts as well as a full-size knife.

It is made from steel produced by Faraday one hundred and fifteen years ago. Sir Robert Hadfield came into possession of some of this steel and conceived the idea of having a number of miniature knives made from it.

Many distinguished people have accepted these knives, including the Prince of Wales, Signor Mussolini and President Roosevelt.

The Queen saw one of the knives in a shop, where a number of Faraday exhibits were on view, and was immediately interested.

When Sir Robert heard of her majesty's interest, he asked her to accept one, which she did, sending him a coin in exchange, according to tradition that the gift of a knife "cuts friendship" or brings some other form of bad luck.

## New Safety Rail Device

### Block Switch Sets Brakes And Rings Alarm In Cab

Probably the greatest single contribution to railroad travel safety in recent years is the "electric eye" of the Sperry rail detector, which is now capable of checking accurately any minute flaw in the rails. Another precaution is the recently developed block switch. In this device coils at the front of the locomotive constitute the "eyes". At the presence of another train on the track they automatically set the brakes and ring an alarm in the cab.

## Shifting Of Earth's Crust

### Scientist Reports Continent Of America Slowly Moving Westward

Indications that the American continent is slowly moving westward were reported by Father Lejay, director of the Zicawei observatory near Shanghai.

The priest, who was in Paris for the convention of the International Astronomical Union, said his calculations for a gravity chart tended to show a shifting in the earth's crust.

## Little Journeys In Science

### PHOTOGRAPHY

(By Gordon H. Guest, M.A.)

Photography enables man to preserve a record of events by means of pictures. Besides being an interesting hobby, it is of great practical use and has become a valuable scientific tool. Many important advances of recent years in science have been aided by the application of photography to record the phenomena studied.

Taking a photograph usually involves the making of two pictures, the negative and the print. The negative is generally made on a supporting sheet of glass or celluloid. The print or finished picture is made on paper.

The supporting celluloid, or glass plate, is covered with a layer of gelatin emulsion in which there are very small particles (known in science as colloids) of creamy crystals of silver bromide and silver iodide. In the case of negatives these particles may vary from eight to twelve one hundred thousandths of an inch in diameter. For prints, however, the particles are about one-fourth this size.

When the plate so prepared is placed in a camera and the image of some object is focused upon it, the silver bromide undergoes a complicated change which depends on the exposure. Too long or too short an exposure will prevent us from obtaining the proper contrast of light and shade. In this way an image of the object photographed is produced upon the plate. This image, however, is invisible and is therefore called latent. It can be made visible by the process of developing.

To develop the image the exposed plate is immersed in a solution called a developer which contains a chemical compound known by scientists as a reducing agent. This substance changes the silver compounds, on which light has acted but will not (within a reasonable time) change those in which action has not been started by the light, into very small particles of metallic silver. The silver so formed is deposited in the form of a black film which sticks closely to the plate. It is these black particles of silver which make up the dark part of the picture. The silver compounds which were not immediately acted on by the developer must be removed, or they will be changed to silver and thus the picture would be ruined.

To remove the unchanged silver compounds the developed picture is placed in what the photographer calls a fixing bath, which consists of a solution of a chemical known as sodium thiosulphate or more commonly as hypo. The unchanged silver salts in the gelatin dissolve in the fixing solution. The plate is then washed with water and dried. The plate is now called the negative because whatever in the original was bright is represented by dark silver and where the original was dark the negative has been washed clear.

The print is made on paper which is prepared in almost the same way as the negative plate. The negative is placed upon this paper and exposed to the light so that the light must pass through the negative before striking the paper. The least light comes through where the negative is darkest and hence this part will be the lightest part of the picture when the silver bromide has been dissolved out. Light passes through the lighter parts of the negative and strikes the sensitive silver bromide on the paper and this part on developing will be dark. The print is thus the reverse of the negative and as the lights and shades correspond with the original it is called a positive. The tint of the positive is sometimes changed by a process called toning.

## Ask For Extra Police

### Smallest County In England Wants Protection Against Speeding Cars

For the twelfth year in succession there has been no assize court held in the county of Rutland, England. True, it is the smallest county in the country, the population being 17,400, mostly farming people, but it is quite remarkable to have no cases serious enough for a judge to deal with.

And yet the county authorities have asked that the police force be increased. There are 17 men now, and one recruit. The authorities want another hobby. The reason is that so many motorists go scorching across the county breaking the speed laws which keep the police force busy and the magistrates from stagnating for lack of something to do, that another policeman is needed to cope with offenders.

If it were not for the motorists, the present force of 17 policemen and one recruit would be about 17 too many.—St. Thomas Times-Journal.

## Household Arts

Brooks

PATTERN 5372

Make a  
Luncheon  
Set or  
Doilies of  
String  
Crochet

These lacy doilies suggest that aliveness that we all aim for in our homes in summer. Lovely for luncheon sets, doilies, refreshment sets as well as many other accessories, they are quickly made. You can use unbleached, white or colored string. You can starch them stiffly if you like and very perky they look this way! The design is so lovely a one that these doilies will be something you'll want about all the time. They make excellent gifts or bazaar donations for even one alone has its uses. They measure 5, 11 and 15 inches in diameter.

In pattern 5372 you will find complete instructions for making the doilies shown; an illustration of them and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

**STOPS ITCHING**  
In One Minute

D. D. D. Prescription Speeds Relief

For quick relief from the itching of pimples, mosquito or other insect bites, eczema, rashes and other skin eruptions, apply Dr. Dennis' pure, cooling, liquid, antiseptic D. D. D. Prescription. Forty years' world-wide success. Penetrates the skin, soothing and healing the inflamed tissues. No fuss—no muss. Clear, greaseless and stainless—dries up almost immediately. Try D. D. D. Prescription. Stops the most intense itching instantly. A 35c trial bottle, at any drug store, is guaranteed to prove it—or money back. D. D. D. is made by the owners of ITALIAN BALM.

## CHAPTER VIII.—Continued

There followed a silence until Cousin Columbine exclaimed: "Dear me! Here I am dwelling on the past like an old woman; when what I started out to tell you was why I wrote that idiotic letter. You see, my mother instilled into me the knowledge that we came of gentle people—finer people, perhaps, than some of our good neighbors. She was an orphan, with no near relatives of her own; but she was very proud of the Nelson connections, and always kept us up to certain standards. If we lived in a cabin with a dirt floor, at least, there were spotless curtains at the windows, and we ate off a white cloth—a clean one too! I think her dream was to send me East for an education; and long as they lived she corresponded with Father's parents, something he might have neglected to do himself. Later she wrote down the names of the younger members of his family, among them your Grandfather Nelson's, Father's half-brother, telling me that if I were left alone and needed help, I was to appeal to them."

"Did you ever have to?" queried Nancy.

The old lady shook her head.

"But I kept in touch with them, as Mother would have wished. Many have died, of course; for Father was so much older than his half-brothers that he was almost of another generation."

"It must seem strange never to have seen any of your own people," commented Jack.

"Not only strange," said Cousin Columbine, "but sad, in a way. It was that sadness which caused me to make a resolution to see some one belonging to me—some one of my own blood, before I died."

"But why didn't you go East for a visit?" questioned the boy, forgetting the consternation he had felt at this idea when, weeks before, Aunt Louise had read aloud the letter from their distant relative.

"Because," responded the astute old lady, "I was not sure of a welcome! I realized that I was nothing to my Eastern cousins but a bit of family history—a queer old woman, perhaps, who was born in a covered wagon, and whose life had been lived in a little Colorado town. Besides, I dreaded to be away from home, even temporarily. My roots go deep, like the roots of an old tree that has never been transplanted. I admit I toyed with the idea; but gave it up; and the next thing was to get some of you to come to me."

She paused, and Jack said, smiling: "But how did you happen to pick out Nancy?"

"I could hardly expect the older members of the family to drop their work and come at the whim of a cousin whom they had never seen, could I? Besides, I had a yearning for some one young. But I've read about these modern girls, Nancy, and was just a bit afraid. Suppose, I asked myself, suppose I get her out here and find she is one of those—those flappers?"

Both young people gave way to

**NATURE'S MINERAL SALTS**

Cleanses the system—purifies the blood. Nothing better for relief of Constipation, Indigestion, Rheumatism, Kidney and Liver. At all Druggists—69c.

**SASKASAL**

laughter, the word sounded so strange on the old lady's lips.

"Do you see now," asked Cousin Columbine, "why I wrote that letter?"

"You mean," said Jack with sudden inspiration, "that no flapper would have accepted your invitation?"

"That's it, exactly. No girl whose sole pursuit was pleasure and society, would have been willing to put up with such a situation. But a girl like Nancy, would, I was sure, be glad to help out a poor old lonely cousin. So I made the job as unattractive as I could. It's true that Aurora doesn't do everything my way; and that often I'm desperate for some one to take a stitch for me, since I loathe the very sight of a needle, and always did. Oh, there was enough truth in that letter so it didn't lie very heavily on my conscience! And when I read it over I said to myself: 'Columbine Nelson, no one but a good, sensible, old-fashioned girl would consider this proposition for a minute; and you don't want the other kind.' So I mailed the letter."

The room was silent for a moment. Nancy's cheeks flamed, not solely from her close proximity to an air-tight stove. What would Cousin Columbine think if she knew how impossible that proposition seemed to her—that nothing in the world save Dad's financial losses would have made her give it a second thought—that she wouldn't have considered it even if Jack hadn't thought out this scheme and put it through while she fought (or wanted to) to the last ditch? Nance knew she was sailing under false colors, and didn't like it. She even avoided meeting her brother's eyes as she responded: "I'm afraid you'll be awfully disappointed in me just the same."

"No," asserted Miss Columbine briskly: "I either like a person at first sight, or I don't like them. Been that way always. I'll admit you look rather ornamental; but that's nothing against you if there are brains in that pretty head of yours, and I don't doubt that, you being a Nelson. As for your brother, his brains were evident in the letter he sent me. Back in my father's day he would have been a pioneer."

Nance laughed.

"I can't see Jack driving a covered wagon, Cousin Columbine!"

"You don't have to in these days of automobiles. But he's got the spirit, and that's what counts, my dear."

Jack flushed now, not being as sure as Cousin Columbine that he possessed the courage of his forefathers.

"When do I go to work?" he questioned, in an effort to change the conversation.

The old lady hesitated, and then said: "Here's my second confession: When I sent that telegram I had a job for you on the McKenzie ranch over Divide way; but the next day Mrs. MacKenzie telephoned that her nephew from Boulder wanted the place after all. Don't look distressed, Jack. You'll have a job before the week is up. I hoped the Adams would have something for you to do, but there are so many boys in the family they seldom hire outside help."

Jack was frowning a little. He said: "I must get something as soon as possible, Cousin Columbine. I don't want to sponge on you for board."

"Fiddlesticks!" she retorted. "This is the first time I've had company in fifty years. But I've asked Mark Adam to be on the lookout, and he'll find something if anybody can. He's smart as a whip; and a good boy into the bargain. All the Adam boys are good. I've always said that if Eve Adam isn't much of a cook, she's a grand success as a mother. Four sons, and every one a credit to the name."

"Eve!" laughed Nancy. "How did she ever dare to marry a man named Adam?"

"Because," replied the old lady with a twinkle, "she'd set her heart on doing just that thing—always said that when she found an Adam she was going to rope him. What she wanted was to find one with Adam for his first name; but when John Adam came along she snapped him up—at least, that's the way she puts it. Eve was a Denver girl. Her

father made considerable of a fortune in gold in 1878, and lost it as many others did just then. After years of hardships, so much money went to their heads. Eve's father bought stock in fraudulent companies, and when the boom collapsed—well, he collapsed with it, you might say."

"Were they left with nothing at all?"

"Practically, but Eve's uncle in the East had money, and gave the girl an education. She was in Boston for three years; and on her way home she met John Adam on the train. He was going to California for his health; but when he saw Eve he decided that his health wouldn't be much use to him in California, if she was in Colorado. You needn't grin, Jack. It was just like that—love at first sight. And when she found his name was Adam, that settled it."

"Did he get well?" asked Nancy. "Mercy yes! As for the boys—you've seen two of 'em. They don't look like invalids."

"And there are two more?"

Cousin Columbine nodded.

"Luke's eighteen, and John will be—"

"You don't mean," gasped Nancy, "that they're really named like that—Matthew, Mark, Luke and John?"

Jack rocked with mirth, and Cousin Columbine's eyes lighted.

"Indeed they are. Folks at Pine Ridge are used to 'em and never think about it; but I dare say it sounds queer to outsiders. That was Eve's doings. She's sort of fantastical and dreamy. But she's a wonderful woman and her husband worships the ground she walks on. I wish I could have got you a job there, Jack. They're fine people the Adams. Goodness gracious, children! it's almost eleven o'clock! I haven't sat up so late since 1902 when the schoolhouse burned down and Aurora pounded on the door to wake me up on her way to the fire. Breakfast at seven. We'd better be getting settled for the night."

It had, Nance admitted, as she snuggled down under the heavy patchwork quilt, been an interesting evening. After all, she wouldn't write that letter to her father—not yet, anyway.

## CHAPTER IX.

More than two weeks slipped by with no sign of a job for Jack. This troubled the boy, though Cousin Columbine insisted that he more than earned his board by chopping firewood—new work to Jack, though when his sister consoled with him one afternoon, he declared he enjoyed it.

"But just the same, Nance," he added, lowering his voice that Aurora Tubbs, peeling potatoes at an open window, shouldn't hear, "I'm worried. I've got to earn some money; ried. I've got to earn some money; body 'round here needs a ranch hand? Mark's been inquiring everywhere and hasn't got so much as a bite. Say!" (tearing off his sweater and tossing it upon the ground), "can you believe it's December first?"

Nance couldn't. There was a tang to the air, but the day seemed more like late fall than winter; and the sky was as blue as it is possible for a sky to be.

"I think," Nancy confided as she perched precariously on the chopping block, "that this bright sunshine keeps us from being homesick. Since that first afternoon I've had

only a few twinges; though I rather dread the time when we're settled down and you away somewhere. Cousin Columbine says we ought to be seeing some of the points of interest around here. I'm going to climb that hill off to the north. Do you want to come?"

Jack glanced at the wood pile.

"Can't just now. You run along alone, Sis. Look here!" (as she started off), "haven't you got anything but those silk stockings?"

"That's exactly what I asked her this morning." Aurora's voice came through the open window. "Like as not that handsome pair of hose will be full of runs when you get back, Nancy Nelson. Why not borrow a pair of Miss Columbine's black cottons?"

Jack was obliged to hide a grin at a vision of his fastidious sister in cotton stockings; and Nance replied, almost impatiently: "Oh, see here, Aurora, didn't Juanita have on silk stockings at the post office this morning?"

"If she did, I'll paddle that girl when I get home," asserted the good woman. "Juanita Tubbs wearin' silk stockin's in the mornin'! What's the world comin' to?"

"Mercy!" gasped Nance. "Have I got Juanita into trouble? I hope not. Next time we go down to the Springs, Aurora, I'll buy some woolen sport hose. I thought I packed a pair, but can't find them. Now don't worry any more on that subject. How do I reached that hill—the one with the pine trees on it?"

(To Be Continued)

**THE RHYMING OPTIMIST**

By Aline Michaelis

AFTER LOVE

Love may come a little while  
When care wanes, or strife;  
Love may walk with you a mile  
And an April hour beguile,  
Only, in your life.

But forever and a day,  
Echoing love's song,  
After love has passed away,  
After gods have turned to clay,  
Memories will throng.

Memories of love's kiss, love's glance,  
These will wake anew,  
With their aura of romance  
Bringing back, through change and chance,  
Joy again to you!

Three hundred chicks have been hatched and successfully reared at Eure, France, from the Canadian Record of Performance stock imported in 1934. As a consequence, representatives from France are to visit Canada this year to make more purchases of Canadian R.O.P. stock.

When we can not find contentment in ourselves, it is useless to seek it elsewhere.

2107

**Little Helps For This Week**

"Who is among you that feareth the Lord, that obeyeth the voice of His servant, that walketh in darkness and hath no light, let him trust in the name of the Lord and stay upon his God." Isaiah 50:10.

When we in darkness walk,  
Nor feel the heavenly flame,  
Then is the time to trust our God,  
And rest upon His name.

He has an especial tenderness for those who are in the dark and have no light, and His heart is glad when they say "I will go to my Father." For He sees thee through all the gloom through which thou cannot see Him. Say to Him, "I am Thy child. Forsake me not." Then fold the arms of faith and wait in quietness until the light goes up in the darkness. Think of something you should do and go and do it, if it be but the sweeping of a room, the preparing of a meal, or a visit to a friend, heed not your feelings, but do your work.

**Life Of Parliaments****Would Limit Length To Minimum Of Five Years**

That five years should be the minimum effective life of parliaments in the empire was one of the suggestions made by Sir Arthur Weigall, chairman of the council, presiding over a luncheon tendered by the Royal Empire society to the delegates from empire parliaments meeting in London.

He also suggested civil servants in Britain and the Dominions should be inter-changeable; and that both in Britain and the Dominions the governments should include a definite number of ministers without portfolio.

With a parliament of less than five years, said Sir Arthur, the ministry was standing in the stirrups and looking for an election rather than settling down in the saddle. (Australian and New Zealand parliaments are limited to three years).

**Root Action Extracts Moisture**

One foot of the heavier type of Saskatchewan soil will hold the equivalent of two inches of rain. A long series of experiments at Swift Current experimental farm by Mr. Taggart, minister of agriculture, had shown that wheat roots would extract moisture from the soil to the depth of six feet, provided no layer of dry earth intervened. There was practically no upward movement of soil moisture except through root action.

Traveller—"Can I get anything to eat in this dump?"

Waiter—"Yas, sah, you kin."

Traveller—"Such as what?"

Waiter—"Such as it is, sah."

## Good Ball By Lone Pine Team

On Monday of this week, Idris Jenkins pitched a one-hit, 7-inning game, resulting in a score of 8 to 0 in favor of Lone Pine against Sunnyslope. The one lone hit came in the second inning, off the bat of Fred Kimmel of Sunnyslope, who later was put out while stealing second.

Twenty-one batters in succession faced the pitcher for 21 put-outs. This is some record for the boys to shoot at.

In the final game, Lone Pine beat Torrington 9-3. Lone Pine took first money, Torrington second, and Sunnyslope third.

## Liberal Meetings

The headquarters of the Didsbury Liberal Constituency announce the following meetings:—

Mr. Charlie Cook of Lacombe is here for a few days, relieving at the C.P.R. depot in the absence of Jim McGhee.

Miss Madeline Masyk of Vancouver, is visiting with her uncle and aunt, Mr. and Mrs. George Hardy, over the holidays.

Mr. and Mrs. W. A. Austin and Elizabeth left Friday for a two week's vacation at their cottage at Sylvan Lake.

Mr. and Mrs. Ed Ford and Mr. and Mrs. Bill Coates left on a two weeks' vacation Sunday, and departed for points unknown.

For Friday and Saturday only, we are giving a pair of good socks with every pair of shoes we sell. T. E. Scott.

Mrs. Wm Sutherland of Ponoka is visiting here with her mother and sister, Mrs. George Smith and Miss Lucille.

Mrs. Sexsmith and her daughter, Mrs. Eva Hopkins are visiting with Mr. and Mrs. Bennie Robinson at Studers' Sylvan Lake cottage, "Ingleside."

Rev. and Mrs. Geeson, Dorothy and Eileen, and Miss Rita Scrutton motored to Sylvan Lake Monday. Dorothy and Eileen are remaining to spend a holiday at Austin's cottage.

Mr. W. H. Zook, representative of the "Associated Temperance Forces", of Alberta, will speak in the M.B.C. Church, Sunday evening, at 7.45 p.m. All are invited to attend.

Mr. M. H. Halton, London England correspondent of the Toronto Star, with Mrs. Halton, were visitors last week-end at the home of Mr. and Mrs. J. W. Halton. Mr. Halton expects to return to England about the twelfth of the month.

After a major operation on his old barn, which left it looking as if a healthy cyclone had struck it, Ed. Rieder is laying a cement floor for a new garage in its place, and has engaged Harry Gabel and Ray Stouffer on the project.

Al Brusso, Tom Royds and Bill Hartley returned from their motor tour and vacation in Glacier National Park, B.C. points, Banff, etc. last Wednesday evening. They report having had a most glorious time. Al and Tom indulged in some tennis and swimming, while Bill enjoyed some good hiking and mountain climbing. Excepting a small mileage in Montana and on the Calgary-Banff highway the roads were very good.
